BHMI Recognized as “Most Innovative Payment Operations Platform” by CIO Bulletin

OMAHA, Neb. – October 2, 2026 – [BHMI](#), a leading provider of back-office payment software solutions, has been recognized by [CIO Bulletin](#) as “Most Innovative Payment Operations Platform.” The recognition highlights BHMI’s continued commitment to innovation in payment operations and its work to help financial institutions, processors, and payment service providers manage the increasingly complex demands of modern electronic payments.

BHMI’s [Concourse Financial Software Suite®](#) provides a comprehensive platform for payment processing operations, including settlement, reconciliation, fees assessment, disputes, and transaction management. Built specifically for the post-authorization side of electronic payments, Concourse helps organizations bring greater visibility, control, and efficiency to critical back-office operations.

“We are honored to be recognized by CIO Bulletin for our commitment to innovation in payment operations,” said Lynne J. Baldwin, President of BHMI. “For decades, BHMI has focused on solving the complex operational challenges that exist behind electronic payments. This recognition reflects the dedication of our team and our continued commitment to developing technology that helps our clients operate more efficiently, adapt to change, and support the evolving payments ecosystem.”

“BHMI represents the kind of innovation that has a meaningful impact on the payments industry. Its Concourse Financial Software Suite addresses the complexity of back-office processing with a sophisticated, scalable platform. We recognize BHMI as the ‘Most Innovative Payment Operations Platform’ for its proven commitment to advancing payment operations and for setting a strong benchmark for innovation in the back-office payments landscape,” said Vishnuvardhan K., Managing Editor of CIO Bulletin.

As payment volumes, payment types, regulatory requirements, and processing models continue to evolve, organizations involved in payment processing face growing demands on their operational infrastructure. BHMI’s Concourse platform is designed to support these changing requirements while providing a centralized environment for managing payment transactions and associated back-office operational processes.

“Payment innovation is often associated with what happens at the point of transaction, but the infrastructure supporting those transactions is equally important,” said Michael E. Meeks, CTO of BHMI. “The ability to efficiently manage settlement, reconciliation, fees, disputes, and other critical processes is essential to delivering reliable payment services. That is where BHMI has focused its expertise.”

The CIO Bulletin recognition adds to BHMI's growing list of industry honors recognizing the company's technology and contributions to the payments industry.

About BHMI

BHMI is a software company specializing in the back-office processing of electronic payments and is the creator of Concourse Financial Software Suite®, a comprehensive back-office payment operations platform designed to support financial institutions, payment processors, and other organizations managing electronic payment transactions. Concourse delivers real-time data access, automated reconciliation, settlement, reporting, fee assessment, and dispute chargeback management. Its continuous processing architecture and configurable rules engine make it ideal for organizations seeking to modernize and optimize payment back-office operations.
